# SPECIFICATION GUIDE

Last Updated December 2022

## PUBLICATION SCHEDULES

Mintec assesses its Mintec Benchmark Prices (MBP) from a variety of locations, and therefore the publication schedule (including assessment timestamps) varies depending on the schedule applied. The MBP assessments in the specifications guide represent the value of a given commodity timestamped against the below times of day:

**EMEA:** 16:00 UK time

**Americas:** 16:00 Eastern time

This information is annotated in this guide next to each MBP assessment under “Publication Schedule”. For full details of bank holidays and early closes, please consult the Mintec Assessment Methodology Guide which can be found at <https://www.mintecglobal.com/mbp>.

This guide is up-to-date as at the time of publication, and notes of any material changes Mintec makes to the guide is recorded the Revision History section at the end of the document. Details of changes and clarifications of assessment specifications are communicated to the market and can be found on the Market Notes webpage at <https://www.mintecglobal.com/marketnotes>

* European Deadweight Pork Grades S & E							

Assessments BW56 and BW19 use a basket of underlying Mintec Benchmark Prices from different European pork-producing countries, combined with a calculation that takes pork production statistics (in tonnes) of each of those countries, and applies a weighting. Countries taken into consideration for the European MBP are Germany, Spain, France and Poland. The weighting used is based upon pig slaughter statistics published by the European Commission, in tonnes, which can be accessed [here](#).

For each assessment of BW56 and BW19, Mintec takes a fixed 3-year average of the slaughtering data from September 2018 to August 2021 inclusive, and calculates the percentage share for each country which is considered for the assessment. The weightings that are used are as follows: Germany (36.31%), Spain (34.19%), France (15.48%), and Poland (14.02%). Mintec reserves the right to reassess and update these weightings as the market deems necessary.

The assessment for European Union Grade S [BW56] uses series BW31 for Germany, BW59 for Spain, BW33 for France, and BW40 for Poland, weighted as above. The assessment for European Union Grade E [BW19] uses series BW04 for Germany, BW06 for Spain, BW07 for France, and BW14 for Poland, weighted as above.

The assessments will be rounded to the nearest Euro cents using the rule that decimals of four (4) or less round down, and decimals of five (5) or above round up, e.g. €1.344 would be rounded to €1.34, and €1.345 would be rounded to €1.35.
